PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence and Data Science student with a strong foundation in Data Analytics, Machine Learning, and Full-Stack Software Development. Proficient in Python, SQL, and building AI-driven applications. Passionate about solving real-world problems through data automation and seeking a challenging internship to contribute to industry-level projects.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science 2023 – 2027
CMS Engineering College, Anna University **CGPA: 8.32**

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **ML & Data Science:** Data Analysis, Predictive Modeling, Federated Learning, Computer Vision
- **Databases:** MongoDB, MySQL
- **Tools & Technologies:** Git, GitHub, VS Code, API Integration (OpenAI/Gemini), Prompt Engineering
- **Core Subjects:** Data Structures & Algorithms, DBMS, Operating Systems, Software Engineering
- **Languages:** English (Professional), Tamil (Native)

PROJECTS

AI Medical Report Analyzer (Prototype) *Python, PDFplumber, OpenAI/Gemini, Flask*

- Built an end-to-end Python app to automate text extraction from unstructured PDF medical documents.
- Implemented NLP techniques to parse critical patient metrics and classify risk profiles.
- Integrated LLM APIs for an interactive patient query chatbot and automated hospital alert workflows.

Sports Event Management System *Python, HTML, CSS, JavaScript, SQL*

- Engineered a full-stack web application to centralize collegiate sports registrations and venue scheduling.
- Designed relational database schemas to execute real-time coordination updates and secure data handling.

AI-Powered Student Study Tracker *Python, Data Structures, Tkinter*

- Developed a desktop application using structural algorithms to track academic habits and optimize schedules.
- Implemented dynamic logic modules to auto-generate personalized timelines based on exam schedules.

Ludo game(Teminal) *Python*

- Spiral Board Game (Python): Developed a console-based two-player spiral board game using Python, implementing game mechanics such as dice-based movement, lucky and trap cells, player elimination, safe zones, and winner tracking.
- Designed the game using modular functions and conditional logic with an interactive board display.

CERTIFICATIONS & WORKSHOPS

- **Machine Learning MasterClass:** Completed an intensive 30-day technical certification program conducted by NoviTech R&D Pvt. Ltd.
- **Introduction to Modern AI:** Certified by the Cisco Networking Academy program.
- **Research Presentation:** Presented a technical paper on "Federated Learning Frameworks using Artificial Intelligence."
- **Technical Training:** Attended specialized Computer Vision and Robotics Workshops at MIT, Chennai.

ACHIEVEMENTS & EXTRACURRICULARS

- **Academic Excellence:** Maintained a CGPA of 8.32/10 in B.Tech Artificial Intelligence and Data Science.
- **leetcode** Solved 40+ LeetCode problems to strengthen problem-solving and data structure skills.
- **Active Hackathon Competitor:**Presented a technical paper on "Federated Learning Frameworks using Artificial Intelligence." Completed certifications in Machine Learning and Modern AI.
